CAREER GUIDANCE EDITION

At Moinee Foundation, we see every day how powerful the early years of learning can be.

When children feel safe, curious, and excited to learn, they begin to build confidence that stays with them for life.

Through our ECE and FLN initiatives, we focus on joyful, play-based learning, where stories spark imagination, numbers make sense through games, and classrooms become spaces of exploration.

This spotlight celebrates those everyday wins that often go unnoticed but matter the most.

As we move forward, our commitment remains simple and strong: to give every child a meaningful start and the foundation they deserve to grow, dream, and thrive.

FROM CONFUSION TO CLARITY: SUPPORTING STUDENTS AT A CRITICAL CROSSROADS

Many students in government schools face career decisions with limited exposure, guidance, and support—often leading to stress and uncertain choices.

The Co-Curricular Program, a CSR initiative by Tata Motors and implemented by Moinee Foundation, addresses this gap through structured career guidance and academic support.

One-on-one counselling and psychometric assessments help students understand their strengths and interests, while Career Walls in schools clearly map post-Class 10 pathways across Science, Arts, and Commerce.

Together, these interventions reduce anxiety, strengthen academic focus, and empower students to make confident, informed decisions, laying the foundation for long-term employability and success.

Shaping Aspirations, Guiding Futures In Ahmedabad

On 14th July, as part of e-Vidya: For Brighter Futures under the Model School Development Program (MSDP), Moinee Foundation facilitated Career Counselling and Guidance sessions for students in government schools in Ahmedabad.

The sessions helped students gain greater self-awareness, understand their interests and strengths, and explore realistic, aptitude-aligned career pathways.

Learners were introduced to future-oriented career options, informed stream selection after Class 10, and the importance of balancing aspirations with skills and opportunities.

Teachers, too, were equipped with insights to better support students during critical decision-making years. The outcome was clear, students left with increased confidence, clearer goals, and a stronger sense of direction toward their academic and career journeys.

Values That Drive Competent Futures

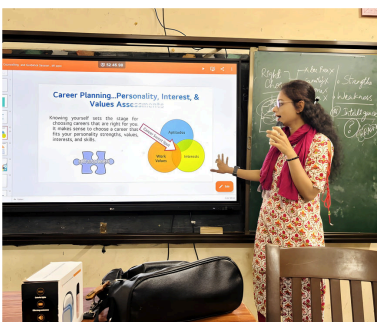

On 12 December 2025, intervention school student beneficiaries across India participated in the third module of our Career Guidance Sessions under the e-vidya for brighter futures Model School Development Program (MSDP) focusing on the role of moral values in shaping career choices.

Through guided discussions and reflective activities, learners explored ethics, purpose, and what it means to build a meaningful and responsible future.

The sessions encouraged students to think beyond surface-level job titles, reflecting on integrity, empathy, and long-term impact as essential elements of career decision-making.
